

CLICK-MATCH.

A challenging collection of matching and catching screens for the very young. Drag the stationary object over its moving partner or click on the moving partner to advance to the next screen. Press the space bar or right click to freeze the screens if the tracking and catching option proves too much of a challenge.

THE SCREENS:

The screens are arranged in **14 categories** – animals, body, birds, clothes, crockery /cutlery, electrical, food, furniture, garden. houses, house parts, musical, toys and transport, with **3 exercises** per category.

Click match 1 – Matching identical objects – The response screen shows the correct graphic and speaks the correct answer.

Click match 2 - Matching identical objects - The response screen shows the correct graphic, speaks the answer and shows the appropriate word.

Click match 3 – Matching the word in the centre of the screen to the appropriate object. The response screen shows the correct graphic, speaks the answer and shows the appropriate word.

The CD also includes Click Match Verbs which comprises two exercises on everyday verbs.

Exercise one involves matching the written verb in the centre of the screen with the appropriate object from a choice of 3 - eg the word **ride** matches the **bike** graphic rather than the spade or telephone graphics. The response screen speaks and shows the written answer – in this case, **‘you ride a bike’**.

Exercise two involves matching two non-identical objects out of four eg. horse, house, telephone and bike. The response screen speaks and shows the written answer – in this case, **‘you ride a bike and a horse’**.
